I.R.IRAN NATIONAL EXHIBITION

YEREVAN - ARMENIA

10-13 JUNE 2021

Who we are

Iran innovation system has many actors, including policy making institutions, ministries, executive agencies and intermediary institutions and advocates for the development of technology and innovation.

Iran National Innovation Fund works as one of the key intermediary agencies under the direct supervision of the presidency with the purpose of financing innovations.

Iran National Innovation Fund (INIF) was established to assist the nongovernmental institutions and firms in commercialization of innovations and inventions.

INIF History

2010 : Parliament passed the Law on the Protection of Enterprises and Technology Based Organizations and the Commercialization of Innovations and Inventions (PETBOCI)

June 2012: Approval of the statute of INIF by the cabinet of ministers

August 2012: First meeting of the board of trustees

October 2012: Announcement of the mandate of PETBOCI by the government

January 2014: Allocation of facilities to new technology-based firms (TBFs) began

Alborz Chemie Asia

1. We are proud to introduce Alborz Chemie Asia Co. as the first concrete superplasticizers based on polycarboxylate ether in the Middle East.
2. This company has been established in 2008 and its managers have been trying their best to produce the best products fitted to the customer's demands
3. Unique and high quality products of this company make products' prices unrivaled. Five years of ongoing efforts as well as trying to obtain the best formula to produce high quality products demonstrate company's management key priority based on customer orientation. Research and Development Group of this company has been trying to keep technical knowledge updated via communicating with accredited universities and research centers globally as well as doing unremitting research to improve products' quality and efficiency. This company produces its products based on the latest modern technology.
4. Alborz Chemie Asia Co. has also received Standard Certificate by Iran Standard and Industrial research Institute.
5. Alborz Chemie Asia Co. presents below services:
6. Concrete additives, concrete adhesive, mortar, sealing materials, Concrete surface Preserver, and repair mortar:
This company presents its products like new generation of concrete additives, concrete adhesive, repair mortar, sealing materials, etc. having experienced experts and technicians as well as applying the most advanced technology.
7. Alborz Chemie Asia Co. is hopeful to take progressive actions in construction industry by producing high quality products and in compliance with consumers' needs.
8. Providing consultancy and support in civil plans
9. Today's additives are considered as one of concrete construction requirements and knowledge of engineers with these materials can be effective to advance the concept of applying these additives. Services which are given by Alborz Chemie Asia are as follows:
Providing consultancy for Concrete Mix Design, Production Process Optimization, Concrete Curing, Formulation Design in accordance to requested concrete specifications for each projects and based on consumer's needs, specific Lab equipment to monitor concrete construction steps and quality control, concrete structures
10. Alborz Chemie Asia Co. provides consultancy and support with engineers in construction industry to prove the concept of sustainable development in concrete industry using proper usage of additives
11. Laboratory and research projects
