## Vice-Presidency for Science and Technology

### ● Introduction:

The Vice-Presidency for Science and Technology (VPST) was established in 2007 to oversee innovation policy. It thus fulfills an important horizontal mandate to engage all relevant parties in supporting innovation as part of its oversight of innovation policy. Various powerful line ministries are provided with extensive resources earmarked for research and innovation within their specific realms of responsibility. The VPST's role in the innovation system as coordinator of innovation policy is of critical importance; it helps to establish a "whole-of-government" (or government-wide) approach characterized by effective cross-ministry collaboration on innovation policy. As one of the vice-presidential offices, it reports directly to the President and paves the ground for greater consistency and closer collaboration among various actors throughout the NIS. The VPST is also expected to link the governance and operational levels of the innovation system.

Nowadays, this office is actively engaged in implementing innovation policy programs, coordinates the initiatives of innovation activities, and takes the ground for active presence of innovative firms, business and economic innovations, and design of innovation policy instruments. The VPST has about 350 staff members in-house, plus consultants and experts based in other organizations to look after various tasks. The VPST does not necessarily try to pursue all tasks in-house; rather, for many activities it relies on the organizations with whom it collaborates. The main internal hierarchy of the VPST includes four deputies responsible for Resources and Development; STI Policy and Evaluation; Technology Development, and International Affairs and Technological Exchange. In addition, it has two special units, namely, the office of KBFs and the Pardis Technology Park (PTP) located just outside the capital, Tehran. PTP is considered to be the most pioneering technology park in the country which supports hi-tech companies to increase their competitiveness in the international markets.

### ● INIF History:

2010: Approval of the Law on the Protection of Enterprises and Knowledge Based Organizations and the Commercialization of Innovations and Inventions (PEKBOCI)

June 2012: Approval of The Statute of INIF by the cabinet of ministers

August 2012: First meeting of the Board of Trustees

October 2012: Announcement of the mandate of PEKBOCI by the government

January 2014: Allocation of facilities to knowledge-based firms began

### ● The Main Purposes of Establishing INIF:

- Assisting the implementation and development of knowledge-based economy
- Completing the “idea to market” chain
- Commercialization of innovations, inventions and research results
- Making the knowledge applicable through the provision of assistance and financial services to support knowledge-based institutions and companies

### Investment

- Venture Capital
- Partnership
- Investment Guarantee

### Capability Building

- Market Development
- Protection of Intellectual Property Rights
- Networking and technological B2B events
- Business Diagnosis
- Consulting & Training
- Obtaining specialized standards and certificates

### Facilities and Guarantees

- Prototyping
- Industrial production
- Employment creation
- Provision of work space
- Best-execution obligation
- Participation in bids and tenders
- Leasing (installment sales)
- Islamic Treasure Bills
- Working capital
- Pre-industrial production
- Obligation to pay (credit)

# ATP

### ● About Company:

As one of the country's largest dental support organizations, we have more than 350 affiliated dental practices in 28 states. Formed in 2014, Armeh Parsian is focused on improving the well-being of both patients and dentists. For more than 4 years, we've taken great pride in our revolutionary approach to dentistry. Our focus has always been on improving the well-being of both patients and dentists.

We Make a private network of dentist and other health service provider that have free times in their office. our affiliated dentists serve their services to our subscriber with 30-50 percent discount (because we fill their free time with patient)

Armeh is grow in Iran and now we to expand our startup in other countries with similar health ecosystem. In this step we target go to Azerbaijan because of our doctors community we can make new private network of doctors in Azerbaijan that present their services with discount for subscribers.

## Products

- Wireless sensors for temperature and humidity, ammonia, carbon dioxide, carbon monoxide, sulfur and CO<sub>2</sub>, O<sub>2</sub>, SO<sub>2</sub>, NO<sub>2</sub>, NH<sub>3</sub>, CO, H<sub>2</sub>S
- A variety of wireless controllers capable of receiving sensor information and connectable to the power panel
- Types of management room monitoring system to collect controller information of a large production site
- Mobile application types for remote site viewing and control

## Nafis Pardazeshgar danesh (NAPADA)

### ● About Company:

Nabada Company was founded in 2016 and received the title of Science Based in the same year from the Vice President of Science and currently holds the following titles, projects and honors:

- 1- Design and construction of a petroleum product pollution prevention and disruption system at a gas station
- 2- Design and construction of gas line pressure monitoring system
- 3- Design and construction of wireless sensors for environmental parameters, controller and monitoring of greenhouse and poultry in management room
- 4- Design and build QR code crop information application using data center information
- 5- Design and construction of wireless sensors for environmental parameters and controller and monitoring of oil and gas refinery in management room
- 6- Top invention of the 95th festival of the country
- 7- Top Technology Unit of 96 Universities and Top Scientists of 97 Universities
- 8- Top Science Based Company of Startup Bank of Agriculture among 180 Science Based Companies participating in the month

Network Engineering and Information Technology

## ● About Company:

Was formed in 2005 with the aim of providing solutions based on Information technology and communications technology based on over 15 years of expertise of its founders.

Based on knowledge and experience from managing several high profile national projects we aimed for a technical and professional company.

We believe the main success factors in this industry are Technology, Product and Customers. We believe in customer satisfaction, great after sales services and continuous education of our personnel as pre-requirements for delivering great services and total solutions with the latest technology available.

To reach these goals we have joined forces with Higher Education institutes and specialized workgroups inside and outside of the country and hope to take positive steps towards these goals.

# Industrial Machinery & Equipment

# ANSTCO

## ● About Company:

Asian Nanostructures Technology Company (ANSTCO) is the Iranian leading knowledge-based company in design and fabrication of electrospinning machinery and production of a wide variety of organic and inorganic nanofibers and nanoparticles through electrospinning and electro spraying processes. Fabricating various types of electrospinning machinery and nanofibrous products in large scales, ANSTCO paves the way for academic and industrial development in nanotechnology. The proposed technology provides the supporting means for innovations and inventions at various levels in nanotechnology fields. Offering a great variety of nano-scaled products, ANSTCO makes the nanotechnology applications possible.

We have been actively involved in design and fabrication of various versatile full-automatic electrospinning machines from laboratory to industrial scales which are successfully commercialized and being utilized in both academia and industry. We have recently designed and fabricated novel hybrid machines for mass production of nanofibers amalgamating electrospinning and solution blown processes.

## ● Certificates:

ISO9001, CE, 9 national patents, and several national rewards

1. Lab scale, bench scale and pilot scale electrospinning machines
  - Needle-based electrospinning machines
  - Needleless electrospinning machines
  - Force spinning machines
2. Industrial electrospinning lines
3. Nanofibrous products for wound dressing and regenerative medicine
4. Nanofibrous products for water purification
5. Nanofibrous products for air filtration (buildings and cars)
6. Nanofibrous superabsorbent products for hygiene industries
7. Melt-blown, solution blown, solution casting and coating machines

# ATRA

## ● About Company:

ATRA Industrial Group is a 14-year-old company from 2005 and one of the pioneers in the industry, especially in the thermal industry.

The activities of ATRA Industrial Group are divided follow:

- Design, construction, and installation of heat treatment line projects
- Production of all kinds of electric and fuel laboratory and industrial furnaces & ovens
- Designing and manufacturing temperature calibration equipment
- Design and production of special ceramics up to 1800 °C
- Design and production of electronic circuits for temperature control

## ● Products:

- Dental furnace (Sintering, Porcelain, ...)
  - Laboratory furnace and oven up to 1800 °C
  - Industrial and laboratory vacuum oven
  - Tube furnace with atmospheric control
  - Dewaxing and curing furnace for Jewelry (Burnout Furnace)
- Industrial furnace and oven  
Heat treatment line  
Pre-heating lines for melting

## ● Certificates:

- Golden Trophy for Quality from France

# Behrad

## ● About Company:

Behrad Sazan Parseh Co, was established in 2008. The company's activities are designing, producing, exporting and importing wide range of soil mechanics laboratory, rock mechanics laboratory, concrete, Strength of Materials, bitumen, asphalt and excavation equipment. Company products were used by many of consulting engineers, public and private contractors, universities and other research and scientific institutions.

## ● Products:

- Digital concrete compression machine
- Concret test cube mold
- Testing sieves.

## ● Certificates:

ISO 9001, ISO 14001, OHSAS 18001

# Control System

## ● About Company:

Control System co was founded on 2008 by a group of researchers, experts and excellent university graduates in the fields of industrial automation, instrumentation, electronics and optoelectronics. The company's main activity is manufacturing high precision instrumentation devices such as different kinds of Refractometers, Conductivitymeters and Flowmeters under the brand named "PrismaTech" which are used in different industrial factories mainly food industries.

Our company won the FINEX 2014 Festival prize (which is hold by the "Iranian National Elites Foundation" every year) as the best electronic designing. We also honored with the selection as a member of knowledge based companies in Iran on Jan, 2015.

All in all we believe that nothing is impossible and we are always eager to obtain new values through new opportunities and experiences and are looking forward to learning more as well as finding new mutual partners everywhere in the world, to expand our knowledge and business.

- Electromagnetic Flowmeter

- Automatic grain and granular sampler
- Laboratory roller mill wheat
- Hectoliter

# Jahan Yekta Parsian

## ● About Company:

Janhan Yekta Parsian is a scientific basis company which innovate a grain automatic sampling with own skillful and expert staffs for the first time in the world. This device is already full automatic and it's abled to do sampling for tracks full of wheat. The other characters of this device is its accuracy, precision and acceleration. Also it has a controlling from laboratory which this attribute cause that no direct interferences of human to perform sampling. Besides it can bring the sample from the lowest layer of the load to a glassy dishes in a short time so it gives a good sample to the supervisor laboratory. The height of this device is 3.3 meters, the length of the moving pol is about 5 meters. The JYP company with its awesome innovation was able to prevent of this types of cheating. More advantages of this superlative device is following below:

1. Decreasing the samplings' time.
2. Preventing of adulterated wheat with no quality
3. Controlling and supervising on the wheat tracks as a input to a factory
4. Preventing of financial damages
5. Increasing of the quality of production with no losing the time.

# Khazar Electric

## ● About Company:

Khazar Electric Knowledge based company started its innovative production since 1981 and now with using the highest technical abilities and over than 150 employees in different fields of engineering continue its work and with design, different patent and innovations in conversion industry, modern poultry and livestock and aquatic accessories, Rendering & cooker dryer for hatchery and slaughterhouse waste. This production based on highest knowledge and technology and observing all scientific points and optimizing fuel and energy consumption.

Khazar Electric designed and manufactured different types of grain and paddy dryer, industrial fans and high technology agricultural machinery with confirmation of Agricultural Research Institute of Agricultural Engineering. Our Company designed and manufactured sterilizer of hospital and laboratory waste machines with approval and license of the general office of Medical Equipment and with experiment of great projects in Iran and more than 10 countries. We try our best to upgrade Iranian industrial abilities entrepreneur and exporter.

# Netco

## ● About Company:

Electro Niroom Taban Control engineering Company has been founded in 1988 with 3 individuals who have had a lot of experience in manufacturing of accessories for low and medium voltage overhead systems. We own 70 percent of domestic market. Our Company has more than 150 skilled staff, including 30 senior & intermediate technical personnel and administrative personnel.

Our main competitive advantages include a highly competent cutting-edge R&D team, competitive price with high quality, flexibility of designing and manufacturing customized products, and fast-delivery.

This company fully equipped with various work shop such as plastic injection shop, tin plating shop, press shop, assembly shop, machining shop, and high pressure die cast shop.

Also we are using a well-equipped laboratory base on EN50483 standard too. The board of directors which consists of shareholders is the only individuals who make strategic decisions in our company. We have a great team of experts and professionals in different departments that have been helped a lot in the quality and the quantity of our products.

## ParsJahd

### ● About Company:

Founded in 1995, ParsJahd as a leading manufacturer of the major parameters in industrial measurement and instrumentation, has determinedly transformed itself to build value for our customer. With our energized focus on our core business platform, Instrumentation Solutions with a Corporate Research and Development located in Iran, Europe and Asia, we can tackle the challenges of an increasingly complex and unpredictable marketplace from a position of strength. This empowers us to drive both near- and long-term value and retain our status with the instrumentation industries. Our alignment produces a highly focused portfolio organized around a solution business model.

Additional to its diverse products of instrumentation, Parsjahd has a division of Automation, by which provides DCS, F&G and ESD solutions and has proved its reliability through its systems' integration.

## Control Gostar Kahroba

### ● About Company:

Kahroba is a private joint stock and knowledge based company with more than 10 years of experience in development and manufacturing of highly innovative products. "Simoto" brand is representing our simulators and virtual reality machines.

Simoto is manufactured for different purposes including Amusement, .Training (Physics, Biology, Medicine, Chemistry, Astronomy, Oil & Gas Industry, Mechanics), Sport, rehabilitation and Advertisement.

With Simoto walking through tropical forests, driving F1 cars, flying over the world's major cities and participating in sailing competitions will not be unreachable dreams anymore.

Our products are designed for commercial sectors with the minimum maintenance costs and modular design which enables you to install or repair them in few steps. We use the latest technologies considering the highest safety standards. Simoto mechanisms are based on servo motors to ensure accurate performance.

We are looking for business partners in Azerbaijan for long term cooperation. Sales, lunching Virtual Reality clubs, VR content production and franchising will be our possible cooperation subjects.

### ● Products:

Simoto Race Metal series, Simoto Race Plus series, Simoto RC, Simoto Trail, Simoto phoenix, Simoto VR zone, Simoto Slide, Simoto Gatling

# Magnolia flavor & fragrance

## ● About Company:

Magnolia flavor & Fragrance Company as the first and biggest manufacturer of food flavors and natural colors in Iran established in 2004. This knowledge based company produce 400 types of food flavors, 20 types of food colors and 30 SQ of natural food marinades. Our production area is located in Kaveh industrial city in 11000 sqm and due to 7 equipped laboratory and well trained specialist in the field of flavor our product widely welcomed in food industry. Currently with 85 employee and 3 headquarters in Tehran, Antalya and Beijing and 10 million\$ raw material stock value we rapidly expanding our business beyond the borders.

## ● Products:

- Flavor for dairy industry
- Flavor for beverage industry
- Flavor for confectionary industry
- Flavor for meat industry
- Flavor for snack industry
- Flavor for sauce industry
- Flavor for tea and coffee industry
- Natural food colors
- Natural marinades for retail market

## Makian Dam Pars

### ● About Company:

Makiandampars Company started its activity in 2004 with the aim of importing and distribution requirements of livestock and poultry operations. The company utilizes its experts, particularly in the poultry industry to reduce production costs and productivity.

Our Company focus is on producing concentrates for broilers and commercial layers with the best quality and import different types of feed additives from Japan, Switzerland and South Korea. In 2018 Makian Dam Pars Company is introduced as an Iranian knowledge-based company with the aim of produce and supply herbal and natural veterinary products in order to promote public health. All our unique products are manufactured under the Good Manufacturing Practice procedure (GMP Certified Products) within stringent quality control process. The carefully chosen team of highly qualified scientists and veterinarians use innovative and safe manufacturing methods to produce highest quality veterinary drugs.

Reliable supply, high customer service and technical support with product development and formulation have made Makian Dam Pars Company one of the fastest growing organizations in the field of herbal veterinary drugs.

## Products

- High temperature anti-corrosion metal coatings (650T- 650NT-1100)
- Engine coolant complete additive package (SNA-HOAT-OAT- metal installations)
- Additive package for metal working fluid (Water/Oil base)
- Engine washing fluid (Internal-External)

# Kimia Boumi Sazan

### ● About Company:

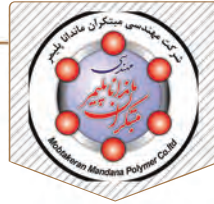

Kimia Boumi Sazan research and manufacturing company was registered in June 2015 as KIMSAN brand. The company completed the pre-growth (28/06/2015- 31/10/2015) and the growth (01/11/2015- 09/01/2019) stages and is now one of the successful companies member of the Science and Technology Park of Kurdistan (Iran). For the first time in Iran, KIMSAN has reached the industrial production of high temperature anti-corrosion metal coatings used in the turbine industry. In addition, two of Kimsan's industrial products, the "complete anti-corrosion additive" and "aircraft deicing fluid", have been unveiled at the 17th and 19th Exhibition of Research and Technological Achievements (Tehran), respectively. Currently, KIMSAN manufactures and markets more than 30 products.

# Padena Polymer

## ● About Company:

Padena Polymer recognized as a knowledge based production company by Iran's VP of science and technology. We are masterbatch and compound manufacturer which are raw materials for production of plastic parts. Some of industries that could be use Padena polymer's products are:

- Steel pipes producers to coat the pipes
- Silent pipes and fittings producers for buildings
- Automobile industry
- Irrigation pipes producers
- Geo-Membrane sheets producers that prevent gas, fluid and humidity leaks
- Gunny, jumbo and plastic bags producers
- Polyethylene and polypropylene based part as home appliances and ...

## ● Products:

- Polyethylene compound for steel pipe coating
- Silent pipe and fitting compound
- HDPE geomembrane compound
- PE pipe and drip irrigation tape compound
- Black and white masterbatches
- Calcium carbonate masterbatches for injection, film and gunny bag
- Flame retardant masterbatch and compound
- PP+ talc, PP+EPDM, PP+ glass fiber compound

## Rangin Nano Newtech

### ● About Company:

The knowledge-based Rangin Nano Newtech Company with a registration number of 1515 is equipped with a Research and Development (R&D) laboratory and located at Incubator Center of Technology Units of Rudehen Islamic Azad University. The company has 10 domestic patents in the field of powder coatings and nanotechnology, 3 international patents, a certificate from Iran Nanotechnology Innovation Council and Vice-Presidency for Science and Technology and certificates from standard labs in Iran, China and Canada. The company is conducting successful projects in collaboration with Iran Nanotechnology Innovation Council and Vice-Presidency for Science and Technology.

Rangin Nano Newtech is the first exporter of nano-technological products in the field of nano paints and coatings to China. The company also has scientific and industrial collaborations with Iraq, Oman, Kyrgyzstan, Azerbaijan, Austria and Canada.

Rangin Nano Newtech is a producer of nano electrostatic powder coatings, water-based nano iron rust converter coatings, cement-based paints for building facades, water-based traffic paints, bitumen-based waterproofing coatings, antibacterial aromatic nano construction paints and water-based sealants and caulks for wood industries.

Considering the applications and advantages of the advanced nano products in the paint and coating industry, some of our products and their capabilities are briefly presented for your information

# Iran Bio-Tech Fund

## ● About Company:

We invest in Iran and Iran related biotechnology and pharmaceutical companies with exceptional technologies or product opportunities based on strong scientific rationale and commercial potential.

If you are an investor, we are very enthusiastic to co-invest with you in biotechnology companies and start-ups and innovative projects including pharmaceutical, agricultural, marine and industrial biotech.

If you are an entrepreneurship or start-up and have made a Joint Venture with Iranian company we can support your JV with the following services:

- Giving long term Loans
- Issuing Letter of Guarantee

If you are a financier and would like to lend, we would like to work with you on financing high-end domestic projects.

- **Website:** [www.biotechfund.ir](http://www.biotechfund.ir)

- **Tel:** +98 (21) 8803 3910

## Creating investment opportunities:

Biotechnology has been one of the fastest growing technologies in Iran over the past years and companies and research centers have made significant breakthroughs in this field. Some of these achievements have the potential to enter the market and compete with other products or even create new market space. Although, various promotion policies have been set to support further development of this technology, there is still a high capacity for investment.

Biotech Fund has already financed several innovative projects in the field of biotechnology and it has also received numerous applications from SMEs and even leading companies. Through its activities and its network, Biotech Fund has prepared a valid database of the most prominent projects ongoing or under consideration in this field. So, if there is an interest in getting more information or taking the opportunity to invest in promising projects or businesses in biotechnology in Iran, certainly, Biotech Fund can be of great assistant to companies or individuals.

You can find highlights of investment priorities in our website.

## Business matchmaking:

Entering regional markets is usually interesting, but it can also be time-consuming and challenging. In order to reach profitability and business growth, knowledge about the market and rivals is of high importance. Biotech Fund helps avid followers of biotechnology find specific business partners in Iran for their product or service. Our matchmaking service forges cooperative partnerships and exchange of experience between companies.

## Tech-Export Services Corridor

### • Introduction:

Tech Export Services Corridor (TESC) provides Iranian high-tech and medium-tech companies with export support services. TESC facilitates the export process for Iranian manufacturers by providing services in the areas of marketing, consultancy, and international alliances.

TESC chooses producers providing the highest quality products based on Export Readiness Assessment (ERA) and supports competent manufacturers in promoting their export share. Therefore, TESC is capable of certifying the quality of products and reliability of Iranian producers in high-tech fields and creating a trustful environment for collaboration between Iranian and foreign companies, as well.

## HT Group

- Introduction:

High-tech is almost synonymous with innovation. Innovations really become successful products or services, when they fulfill a real need or market demand (which sometimes can be a 'hidden demand'...look at tablet computers: nobody 'needed' them...until they became available!).

'Golden rule' here: the sooner you involve potential customers, the better the fit: it's often best to start 'selling' your idea even before your final product exists! (Methods like Lean Startup can prevent spending time and money to create something that might just not be what your customer is looking for!)

Although a brand new technology might act as the real trigger for a disruptive innovation, it's crucial to also check market potential from the very first beginning. You'll only get a commercial success if the result is really what customers have been waiting for. Part of such success is also selecting the right product promotion strategy and finding sales channel partners to help you to effectively reach your target customers. In most cases it makes sense to have an international focus from the beginning. Visiting exhibitions and networking in relevant user groups are excellent methods to build up knowledge on new markets, together with on-line research. This takes valuable time and it's smart to find a specialist early on, who can help you to get things moving faster.

With HtGroup, We Have built up a significant market knowledge and an up-to-date network. In many cases we can help you further by immediately connecting you to relevant people, both at suppliers and partners as well as at potential customers. Click here to see how I've helped others!
